Lawn Grass Seeds

Making a lawn is a job that most of us only have to undertake once or twice in a life-time. We build lawns for permanence, and for that reason we OUGHT to go about it with the utmost care. The soil should be carefully prepared before planting the seed and buy the VERY BEST SEED OBTAINABLE.

It requires about 10 pounds of Blue Grass seed to 1,000 square feet (Bent seed about 5 pounds). Fertilize with a good commercial fertilizer such as Vigoro, Sacco, Ivy, Milorganite or Loma, using 100 pounds to 2500 square feet, and cover with Peat Moss. (1 bale covers about 1,000 square feet.)

SHEEP MANURE is very good, as it contains some HUMUS and is especially good to mix in your vegetable garden soil. 100 pounds covers about 500 square feet. You can make a good liquid manure by mixing one pound of Sheep Manure with five gallons of water. Bags of about 100 pounds for \$1.50 of the Regular Grade and 50 pound bags of Sterilized (weed free) Grade for \$1.40 F. O. B. Denver.

We are always pleased to help you with your lawn problems.

These prices are NOT PREPAID. If wanted by mail, include postage at the regular zone rates.
